# **RENOLD** WM Series

## Directly interchangeable

***Introducing the WM Series Gear Unit from Renold Gears - the leading manufacturer of Wormgear Units.***

Renold Gears has extended its range of WM Series gearboxes to be directly interchangeable with David Brown's metric Radicon series.

The critical mounting and shaft extension dimensions in the new WM boxes are now identical to those in the Radicon units so that any old Radicon box can be replaced with a new Renold WM unit as a simple 'drop in' replacement.

The entire WM range is now available in nominal metric and traditional inch sizes, with new centre distances of 100, 125, 160 and 200mm. A complete range of ratios is available from 5:1 to 70:1 enabling customers to choose a lower cost, or more appropriate solution, than was previously possible.

The WM series is part of a diverse range of gear units manufactured by Renold, designed to meet customer's unique requirements.

Renold	David Brown
WM 100	A 100
WM 125	A 125
WM 160	A 160
WM 200	A 200

- Renold has enhanced the wormgear range with the launch of the metric WM Series range.
- Available in four sizes: 100, 125, 160, 200mm centres.
- 10 Ratios available as preferred stock ratios: 5, 10, 15, 20, 25, 30, 40, 50, 60, 70.
- Directly interchangeable on all shaft and mounting dimensions as the David Brown Radicon 'A' Series mid range units.
- Complements the imperial drop-in range of WM Series and Titan wormgear units.

### **Applications**

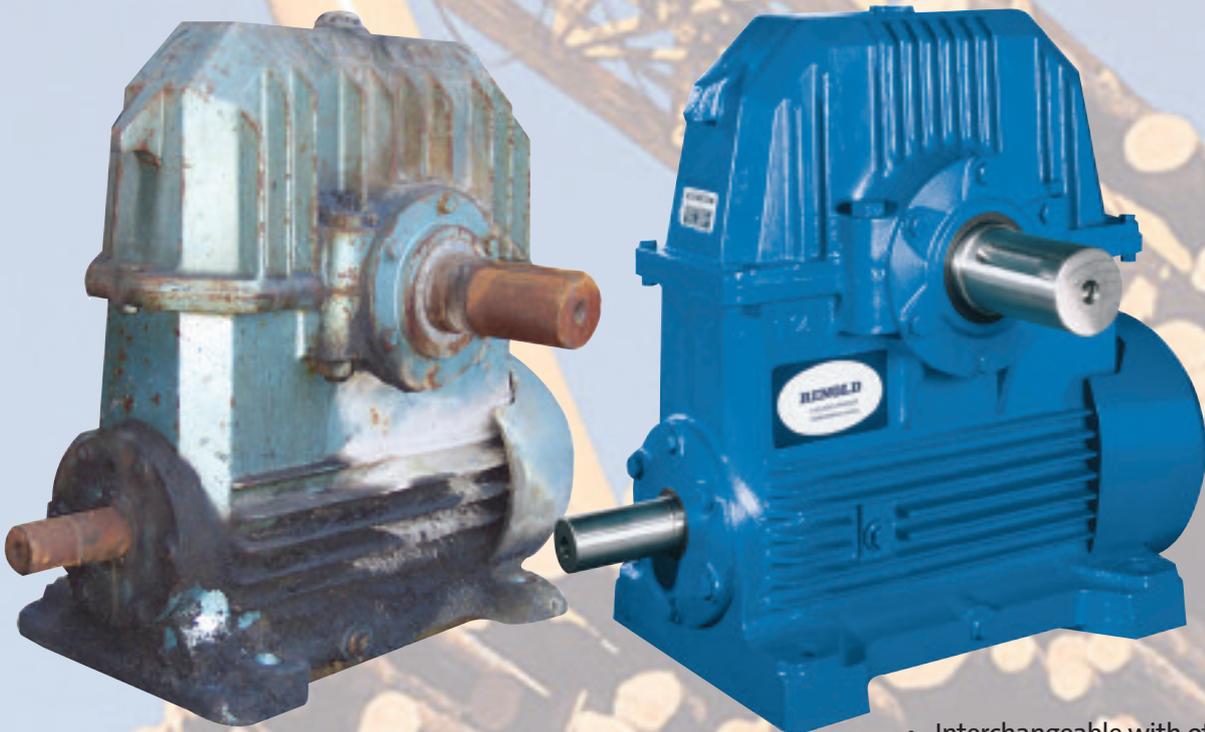

- Conveyors
- Mining
- Timber
- Textiles
- Materials Handling
- Packaging Machinery
- Food Process Machinery
- Water Treatment
- Foundry Equipment
- General Industrial Applications

***The complete range of Renold WM Series Metric Wormgear Units are now available through your local Sales and Service Centre. Ask for details.***

# **RENOLD** TW Series

## New for old

*Introducing the TW Series Gear Unit from Renold Gears - the leading manufacturer of Wormgear Units.*

The heavy duty TW series unit offers a power increase of up to 35% and yet is still dimensionally interchangeable with the previous generation units from Holroyd, Croft and other leading UK gear manufacturers products. However the unique Holroyd tooth form offers maximum torque capacity and high unit efficiency, perfectly suited to today's increased demands on machinery performance.

**'NEW FOR OLD'** - Why repair your worn out non-Renold wormgear?

Send us your old 10" to 28" unit and we will replace it with a preferentially priced new unit.

The TW series is part of a diverse range of gear units manufactured by Renold, designed to meet customer's unique requirements.

Renold	David Brown
TW 10	BU,CU10
TW 12	BU,CU12
TW 14	BU,CU14
TW 17	BU,CU17
TW 20	BU,CU20
TW 24	BU,CU24
TW 28	BU,CU28

- Interchangeable with other manufacturers.
- Available in 10 standard types with 10" to 28" centres.
- Ratios from 5:1 to 70:1 as single reduction units and 75:1 to 4900:1 as double reduction units.
- Available without plastic or aluminium components for use in flameproof areas.

### Applications

- Conveyors
- Mining
- Timber
- Textiles
- Materials Handling
- Packaging Machinery
- Food Process Machinery
- Water Treatment
- Foundry Equipment
- General Industrial Applications

***The complete range of Renold TW Series Wormgear Units are now available through your local Sales and Service Centre. Ask for details.***
