

RENOLD CHAIN UK

Your Renold Chain Centre

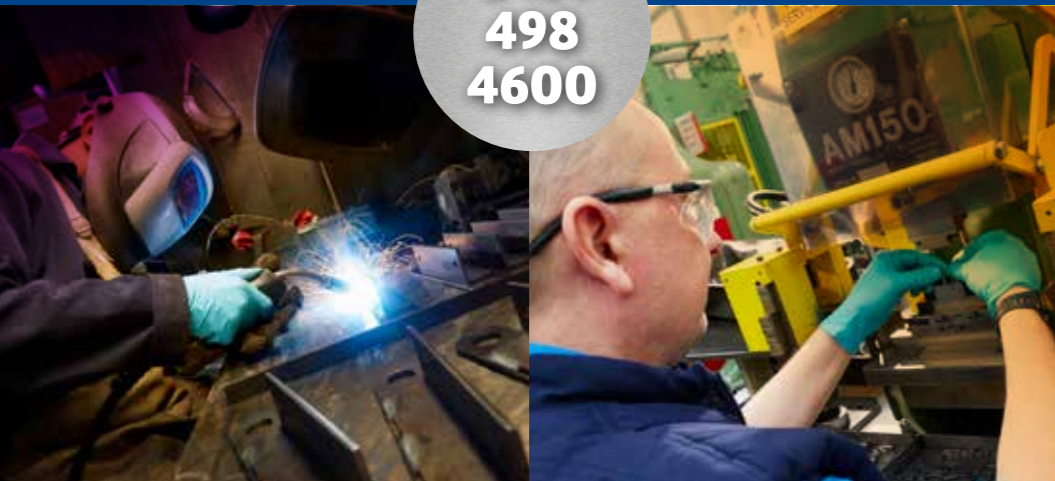

Operating out of an 18,000 square foot facility with extensive warehousing and stock availability, Renold's UK Chain centre is able to offer a fast turnaround for all types of attachment, transmission and conveyor chain for a wide range of industry sectors to exact customer requirements.

The UK Chain Centre is equipped to supply for standard, adapted and special conveyor chain with up to 90k lb plates. It has the in-house capability to provide chain with a range of coatings, specialist heat treatment, spin rivets, and with welded and integral attachment plates. The chain centre has the flexibility and stock availability to respond rapidly to a wide range of requirements for chain in a multitude of different industrial applications in either metric or imperial pitch sizes.

Our services include chain measuring and matching on high precision rigs and preloading on specialist machinery. Measuring and matching is particularly important, for example, on positioning applications where two strands of chain need to be in perfect alignment with each other, and the preloading of chain eliminates initial wear, or elongation, after installation.

The chain centre has the facilities to provide an in-house lubrication service for chain destined for a wide range of applications and environments. This includes food grade lubrication, cold temperature lubrication, hot lubrication, wax lubrication for dusty environments like quarries, and marine lubrication for salt water conditions.

RENOLD

RENOLD CHAIN UK

24 hour turnaround on standard adapted chain orders

Superior Chain Technology

RENOLD

RENOLD CHAIN UK

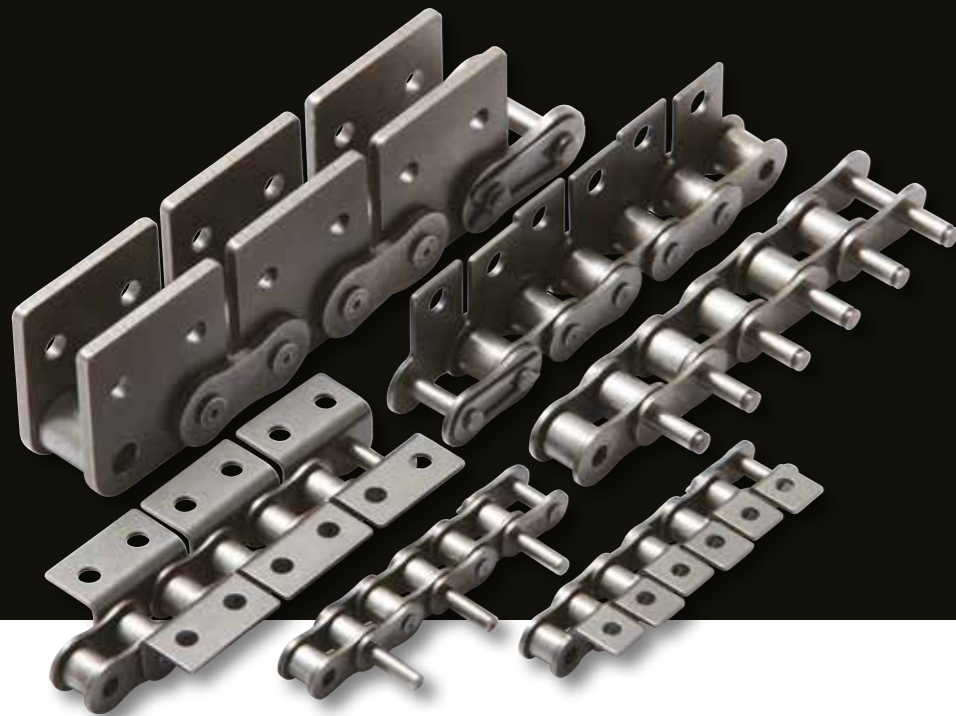

Standard adapted Chain despatched in 24 hours. Guaranteed.

Renold's dedicated team of specialist engineers provide a guaranteed 24 hour attachment chain service for BS steel transmission chain, from half inch (08B) to one inch (16B) pitch, with standard M and K attachments, extended pins, and in accordance with customer specifications.

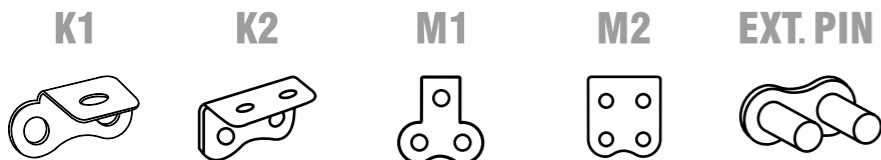

Get an instant quotation over the phone and as soon as an order is confirmed the chain will be built using Renold's high performance base chain and attachments.

- Outstanding service
- Fast quotation
- Rapid delivery

Attachment types:

RENOLD CHAIN UK

STOCK

The Renold UK Chain Centre stocks a broad range of standard transmission chain for same day despatch:

- SD, Standard duty transmission chain manufactured to ensure consistent quality and good performance.
 - Renold, Premier standard transmission chain with excellent wear and fatigue performance.
- In addition, same day despatch is also available on Renold's range of solution chains:
- Synergy, the industries highest performing transmission chain with unbeatable wear and fatigue resistance
 - Syno, for use in hygiene sensitive applications or where contamination from lubricant is to be avoided
 - Stainless steel chain which offers maximum performance in wet environments
 - Hydro-service, incorporating the strength of carbon steel with superior corrosion resistance

Transmission Chain Accessories (08B-16B)

- Pulleys
- Anchor studs and plates
- End attachment links
- Draw bolts and blocks

BUILD

Standard & adapted Conveyor Chain

Strict control of our material specification and state-of-the-art heat treatment processes ensure that our precision conveyor chain achieves maximum strength and resistance to wear. Our UK Chain Centre produces conveyor chain to BS, ISO, M and FV specifications and our engineers are always available for specific advice about your requirements or a particular product.

We can also build a wide range of product types based on a range of components which are kept on our shelves. These include:

- Solid & hollow bearing pins
- Polymer bush inserts
- Bi-planar chain
- Special attachments & bespoke adaptations
- Food-grade lubrication
- Temperature-resistant lubrication
- Hot-dip greasing
- Zinc coating
- Yellow passivate plating

CUSTOMISE

For custom solutions, the Renold UK Chain Centre can draw upon a wide range of services and expertise to supply:

- BS Transmission and conveyor sprockets with bore keyway and set screw customisation to the customer specification
- Adapted-attachment transmission chain with customer specified attachment dimensions built onto Renold base chain.
- Standard attachment conveyor chain: Standard F, K and L attachments welded to UK chain centre built standard conveyor chain.

ENGINEER

The UK Chain Centre's dedicated engineering team develop solutions including:

- Engineered Conveyor chain
- Aircraft chain (certified)
- Adapted-Attachment conveyor chain
